	D13235 Tall Handles for Legacy, adds 3" heig	ht	Ph:	Zipcode for delivery
Mark For		User weight	User heightFlo	or to Elbow

This walker will be built in our shop. It cannot be shipped totally assembled. The handles will need to be inserted and adjusted for height and length. It is not recommended for drop ship delivery unless a technician can be present to make the adjustments to fit the client. Arm troughs may block use of seat for sitting, platform will block use of seat. Note, the part numbers in the chart above do not indicate all components necessary to complete the walker assembly. Quote will show all necessary pieces. Non-returnable.
