

The LEGACY

Dolomite developed the **Legacy** to provide the most standard features to a variety of users for the best value. Over the years **Legacy** has proven to be a reliable aid for mobility. **Legacy's** steel frame is welded for greater durability, no screws to loosen at joints. The framework is powder-coated for corrosion-resistance and comes in Metallic Blue or Red. With forward facing handles and flip-up seat you walk within the **Legacy** footprint with frame supporting you on all sides. Handles are height-adjustable for best posture while walking. Push the seat down to hear a click alerting you that the walker is locked open. **Legacy** is easily folded for storage or transportation, lift seat handle to release and fold.

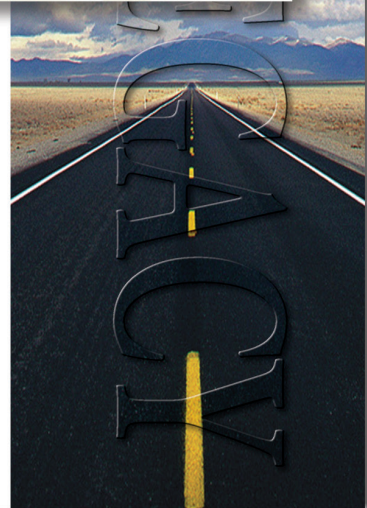

Legacy comes with the patented **Dolomite DABS** braking system, with adjustable tension for varied grip strength. Brake handles have a wide flange and large loops for comfortable hand positioning. When parked and seated, push down the handle to set parking brakes. The braking mechanism is located within the fork for protection from damage. Optional accessory slow-down brakes offer adjustable tension on the tires for more control on hilly terrain or to even out direction of travel for stroke patients.

Standard Features

- 330 lb. capacity
- Flip-up seat for greater reach or gait training
- Ergonomic and secure hand grips
- Flexible and adjustable back strap
- 8" indoor-outdoor solid tires
- Basket with carry handle

Warranty

To the original purchaser, **Dolomite** provides a limited two year warranty against manufacturer's defects on the frame, five years on the brake handle and one year on parts. Excludes tires, brake cables grips, damage due to wear and tear, abuse or misuse.
